

ECON-E-COAT®

Engineered for High-Performance Coating

Therma-Tron-X's Econ-E-Coat® is a compact, high-density electrocoating system made for portable, efficient finishing operations.

INNOVATION

- Compact, modular portable system
- Automated carousel transfer
- High density - compact package
- PLC-controlled operation
- Customized for customers unique process

EXPERIENCE

- Proven long-term reliability with 35+ years of experience.

QUALITY

- Enclosed process design
- Integrated cure and cooling
- Durable immersion tanks
- Precision coating control

SUSTAINABILITY

- Reduced supply chain time and logistics costs
- Ease of maintenance and system reliability
- Low rejection rate

THERMA-TRON-X, INC.

Your Best Finish Starts With Us!

ENERGY EFFICIENCY

- Automated paint feed
- Water-saving rinse system
- Ultra-filtration technology
- High-density throughput

CUSTOM INTEGRATION

- Modular design
- Relocatable system
- Multiple pretreatment options
- PLC/HMI controls

CUSTOMER BENEFITS

- Space-saving layout
- Easy installation
- Proven reliability
- Consistent coating quality
- Lower operating costs

AVAILABLE CONFIGURATIONS

- Pretreatment systems
- E-coat application options
- Wastewater treatment options
- Additional support equipment
