

VOC DESTRUCT

ENGINEERED FOR THE ENVIRONMENT

Therma-Tron-X's VOC Destruct systems are engineered to remove volatile organic compounds from the air. Air that would be exhausted is pulled into the VOC Destruct and is sucked through a media that will eliminate the fatty acids and VOC's.

INNOVATION

- Pattered VOC Destruct System
- Advanced recirculation technology
- Intelligent heat recovery
- Flexible process solutions

EXPERIENCE

- Decades of finishing system expertise
- Proven industrial performance

QUALITY

- Precision-engineered construction
- Reliable long-term performance
- Durable industrial components

SUSTAINABILITY

- Utilize variable frequency blower drive systems
- Save energy and lower costs
- Efficient energy usage

THERMA-TRON-X, INC.

Your Best Finish Starts With Us!

ENERGY EFFICIENCY

- Heat recovery technology
- Reduced exhaust emissions
- Lower operating costs

CUSTOM INTEGRATION

- Custom oven configurations
- Seamless production line integration
- Batch and conveyORIZED ovens

CUSTOMER BENEFITS

- Reduced operating costs
- Improved workplace air quality
- Increased productivity
- Lower maintenance requirements

AVAILABLE CONFIGURATIONS

- Baking and dehydration ovens
- Curing ovens
- E-coat ovens
- Multi-zoned ovens
- Both direct and indirect heat input
- Special use ovens
