

# MONORAIL

## Engineered for Precision and Efficiency

TTX Monorail Systems are custom designed to move products efficiently through every stage of the finishing process. From pretreatment and E-coat to powder and liquid finishing, each system is engineered to maximize throughput, improve coating quality, and deliver dependable long-term performance through fully integrated process solutions.

## INNOVATION

- Supports spray, immersion, powder, liquid, E-coat, and custom combination finishing processes
- Optimized immersion tank design improves paint circulation
- High-efficiency conveyor drives and bottom-entry ovens

## QUALITY

- Heavy-duty conveyor systems designed per customer requirements
- Durable stainless steel washers
- Bottom entry ovens
- High efficiency drives
- Engineered for complete drainage, easier cleaning, and simplified maintenance

## EXPERIENCE

- Proven monorail finishing systems built for reliable, continuous operation.
- More than 55 years of designing and manufacturing monorail systems across a wide range of industries

## SUSTAINABILITY

- Minimized heat loss and efficient drives
- Easy to clean and maintain
- Efficient wastewater management
- Process-first engineering optimizes material usage while reducing operating costs

THERMA-TRON-X, INC.  
**TTX**

# ***Your Best Finish Starts With Us!***

## **ENERGY EFFICIENCY**

- Ovens designed to minimize heat loss
- High efficiency conveyor drives

## **CUSTOM INTEGRATION**

- Powder systems
- Fluidized bed dip systems
- E-coat systems
- Liquid paint systems
- Custom combination systems

## **CUSTOMER BENEFITS**

- Ideal for high-volume, continuous productionEnhanced paint circulation and quality
- Proven solution for large production runs and repeatable throughput
- Flexible enough to support multiple coating technologies on one line
- Engineered for maximum uptime and long-term reliability

## **AVAILABLE CONFIGURATIONS**

- Stainless steel washers
- Bottom entry ovens
- Climate controlled environmental rooms
- High efficiency conveyor drives
- Wastewater treatment equipment
