

POWER AND FREE

Engineered for Efficient Product Movement

Therma-Tron-X designs, builds, and installs customizable Power and Free conveyor systems that automate material handling and maximize production efficiency for a wide range of applications. Every system is designed to integrate seamlessly with finishing, assembly, and shipping operations while delivering reliable performance, increased throughput, and long-term value.

INNOVATION

- Seamless integration with Programmed Hoist or SST®
- Variable speed operation
- PLC-based monitoring and control
- Part tracking and data management
- Intelligent routing for multiple processes

EXPERIENCE

- Hundreds of successful installations across a wide range of industries
- More than 55 years of designing custom material handling systems for industrial finishing
- Proven solutions for complex finishing operations

QUALITY

- Heavy-duty conveyor systems
- Safety focused design
- Precision load handling
- Reliable carrier engagement mechanisms

SUSTAINABILITY

- Reduced manpower requirements
- Reduced facility footprint
- Improved resource utilization
- Reliable performance for years
- Variable-speed controls

THERMA-TRON-X, INC.

Your Best Finish Starts With Us!

ENERGY EFFICIENCY

- Variable speed capability
- Low-speed processing operation
- Reduced staging requirements
- Efficient product movement

CUSTOM INTEGRATION

- Multiple conveyor line switching
- Manufacturing process integration
- PLC and data management systems
- Hydraulic or electrical lowerators available

CUSTOMER BENEFITS

- Fully automated material handling
- Maximum process flexibility
- Increased productivity
- Reduced labor requirements
- Stationary load/unload

AVAILABLE CONFIGURATIONS

- Overhead and Inverted
- Hydraulic/electrical lowerators
- Multi-line switching systems
- Custom-engineered layouts
- Intelligent product routing
- Flexible manufacturing
- Buffering and Accumulation
- Industry 4.0/5.0 Ready
