

INTERGATED FINISHING SYSTEMS

Engineered for Complete Finishing Solutions

Therma-Tron-X designs, fabricates, and installs coating systems combining E-coat with powder or liquid topcoats for OEMs and contract coaters.

INNOVATION

- Multiple material handling technologies
- Combination coating solutions
- Engineered around unique customer requirements
- Flexible designs that maximize production and minimize floor space

QUALITY

- Consistent, repeatable performance
- Single-source responsibility for engineering, fabrication, installation, controls, start-up, and service
- Hand crafted using the most up to date, precision equipment
- Designed to meet exact production requirements

EXPERIENCE

- Decades of success
- Process first engineering
- Expertise across every stage of the finishing process

SUSTAINABILITY

- Intelligent water management, resource conservation, and energy-efficient design
- Combined processes to conserve floor space and energy
- Reduced handling and increased productivity

THERMA-TRON-X, INC.

Your Best Finish Starts With Us!

ENERGY EFFICIENCY

- Combined curing processes
- Reduced re-handling of parts
- Integrated thermal systems
- Streamlined production flow

CUSTOM INTEGRATION

- Powder and liquid spray booths
- Pretreatment and immersion systems
- Environmental control rooms
- Wastewater and RO systems
- Iron removal and water treatment

CUSTOMER BENEFITS

- Process-first engineering to customers unique application
- Reduced labor requirements
- Increased production efficiency
- Improved coating quality and durability
- Space-saving system design

AVAILABLE CONFIGURATIONS

- SST®
- ACC®
- Conveyor systems (floor and overhead)
- Programmed hoists
- Metal pretreatment systems
- Ovens
- Environmental rooms
- Liquid spray booths
- Wastewater treatment systems
- Reverse osmosis units
- Iron removal units
- Water reuse systems
